

AvalonSelect Genetic Network

Industry Challenge: Genetic Testing Management is Increasingly Complex

The market for genetic tests is growing rapidly and is projected to double by 2025. Ensuring access to quality testing while controlling costs has become increasingly complex and resource-intensive.

Our Solution: AvalonSelect Genetic Network

AvalonSelect Genetic Network can help health plans simplify genetic test management and decrease costs and administrative burden while improving the quality of genetic tests provided to members.

 <p>Reduces/eliminates Prior Auth for gold-carded providers</p>	 <p>Drives quality enforcement - Labs must meet strict criteria</p>	 <p>Manages genetic testing spend & network complexity</p>	 <p>Increases savings with national fee schedule</p>	 <p>Drives innovation & pace with science without administrative burden</p>
---	---	--	--	---

Avalon's genetic network is a select group of preferred genetic labs coupled with robust consultative services that complement a health plan's existing routine lab network. Health plans can continue to leverage their current lab relationships while outsourcing the management of genetic testing, pricing, compliance enforcement, test quality assessment, new test evaluation, and contracting to Avalon.
