

AVALON HEALTHCARE SOLUTIONS **SEPTEMBER WEBINAR**

September 14, 2021

OVERVIEW & INTRODUCTIONS

Barry Davis, Chief Growth Officer, Avalon

Before we start

This meeting is being recorded

We will be **MUTING** everyone except the presenter to make sure the AUDIO is clean and clear

Q&A will be done by using the “**Questions**” feature

Agenda

OVERVIEW AND INTRODUCTIONS

Barry Davis, Chief Growth Officer, Avalon

WASHINGTON, D.C. POLICY UPDATE

Julie Barnes, Principal, Maverick Health Policy

LAB NETWORK UPDATE

Mike Snyder, EVP Network Operations, Avalon

DELIVERING VALUE-DRIVEN CARE USING LAB TEST RESULTS

Rahul Singal, M.D., Chief Medical Officer, Avalon

CLOSING REMARKS

Bill Kerr, M.D., Chief Executive Officer, Avalon

POLICY UPDATE

Julie Barnes, Principal, Maverick Health Policy

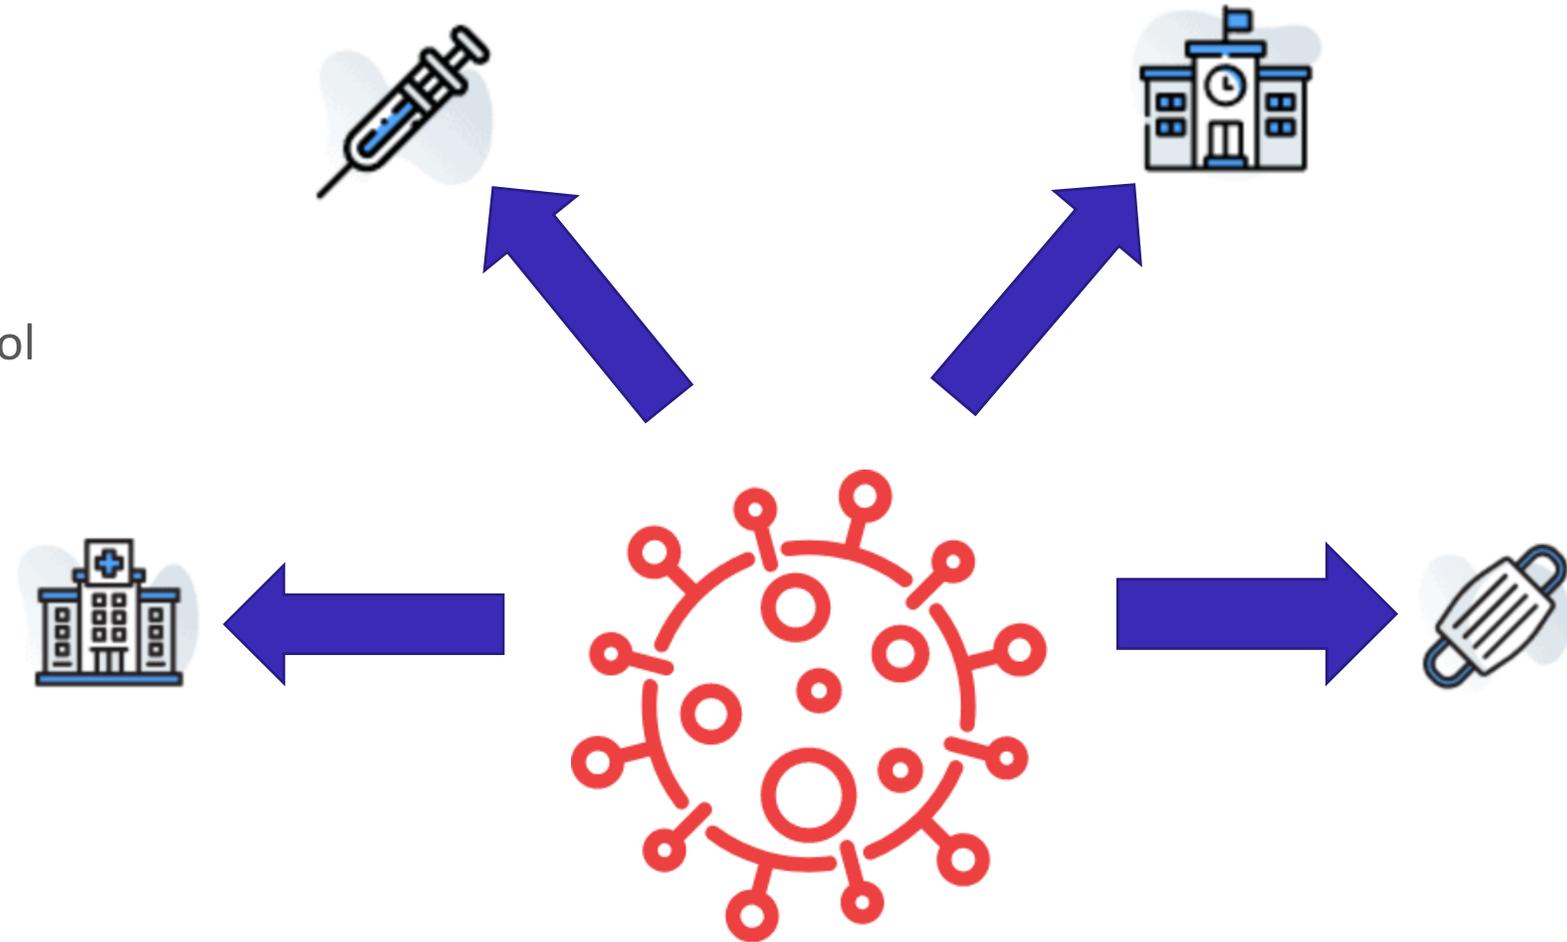

Overview

- COVID-19 Update
- New National COVID-19 Strategy
- Future COVID-19 Strategy

COVID-19 Status

- Cases
- Hospitalizations
- Deaths
- Vaccines
- Back to work and school
- State and local rules

Path Out of the Pandemic – President Biden’s Latest Plan

Vaccinating the
Unvaccinated

Further Protecting
the Vaccinated

Keeping Schools
Safely Open

Increasing Testing &
Requiring Masking

Protecting Our
Economic Recovery

Improving Care for
those with COVID-19

Pandemic Plan

Private Sector Mandate

- Department of Labor OSHA rulemaking coming soon
- Emergency temporary standard for businesses with 100+ employees
 - Fully vaccinated or regular testing
 - Paid time off to get vaccinated

Health Worker Mandate

- CMS / CDC announced Interim Final Rule expanding on nursing home mandatory vaccinations will be issued in October
 - Employees of facilities that receive federal funding (Medicare, Medicaid) must be vaccinated

Federal employees, contractors and employees of federal contractors must be vaccinated.

- “If you want to do business with the federal government you must be vaccinated.”

Pandemic Plan

Increasing Testing and Requiring Masking

Using Defense Production Act to accelerate production of and access to rapid and at-home COVID-19 tests

- Procure 280 million tests for long-term care facilities, community testing sites, etc.
- Expand pharmacy testing
- Amazon, Kroger and Walmart will sell at-home tests at cost—a 35% consumer discount for the next 3 months
- 25 million free at-home tests will be sent to community health centers and food banks
- TSA has extended its mask mandates for air and ground travel through January 18, 2022, double fines for violators

Increasing Testing &
Requiring Masking

FUTURE Pandemic Plan

Jake Sullivan
National Security
Advisor

Eric Lander
Assistant to the President
for Science and Technology

September 3, 2021

American Pandemic Preparedness: Transforming Our Capabilities

\$65.3 billion to overhaul pandemic preparedness infrastructure

- I. Transforming our Medical Defenses
- I. Ensuring Situational Awareness about infectious-disease threats, for both early warning and real-time monitoring
- III. Strengthening Public Health Systems
- IV. Building Core Capabilities, including PPE, stockpiles and supply chains, biosafety and biosecurity, and regulatory improvement.
- V. Managing the Mission

LAB NETWORK UPDATE

Mike Snyder, EVP Network Operations, Avalon

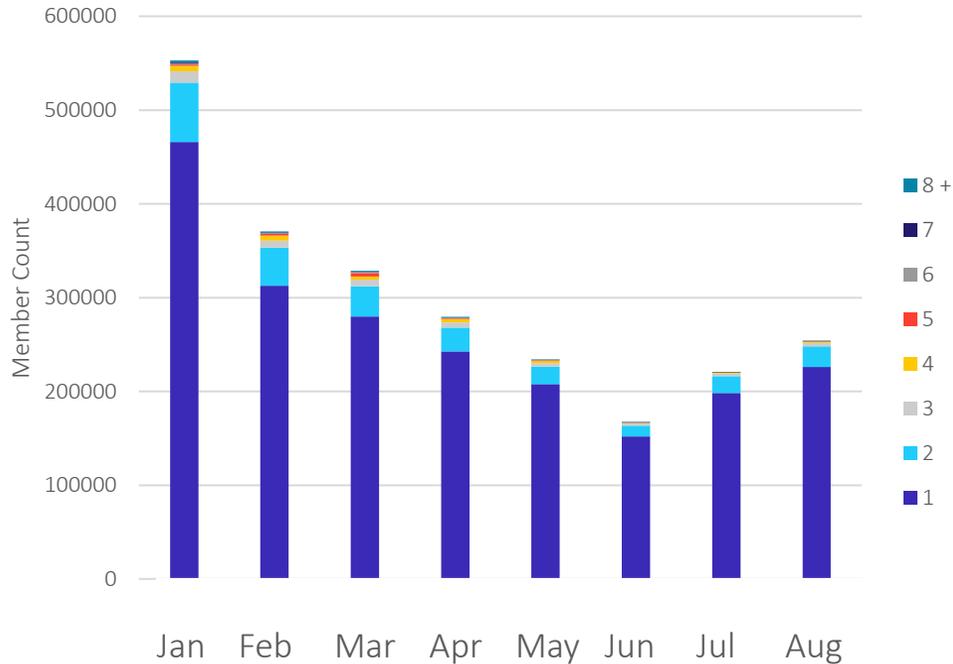

Avalon Network COVID-19 Capable Labs

Lab	RT-PCR Y/N	Multiple Platforms	Capacity (per day)	TAT
Quest	Y	Y	300,000	1-2 days
LabCorp	Y	Y	275,000	1-2 days
Mako Medical Lab	Y	Y	150,000	1 day
Aegis	Y	Y	110,000	1-2 days
BioReference	Y	Y	100,000	1 day
Premier Medical Lab	Y	Y	100,000	1-2 days
Eurofins-Diatherix	Y	N	60,000	1-3 days
PathGroup	Y	Y	50,000	1-2 days
GenetWorx	Y	Y	40,000	2 days
AIT (American Institute of Tox)	Y	Y	20,000	1-2 days
Sonic-CPL	Y	Y	20,000	1-3 days
MDL (Medical Diagnostic Lab)	Y	N	12,000	1 day
AccuReference	Y	N	10,000	2 days
LabTech	Y	Y	10,000	2 days
Precision Genetics	Y	N	10,000	1-2 days
Inform Diagnostics	Y	N	7,000	1 day
Genesis DX	Y	Y	5,000	1 day
Luxor	Y	Y	5,000	1 day
Transplant Genomics	Y	N	5,000	1-2 days
BAKO	Y	N	2,500	1-2 days
Radeas	Y	Y	2,400	1-2 days
NephronPharm	Y	Y	2,000	2-3 days

Sept 7, 2021

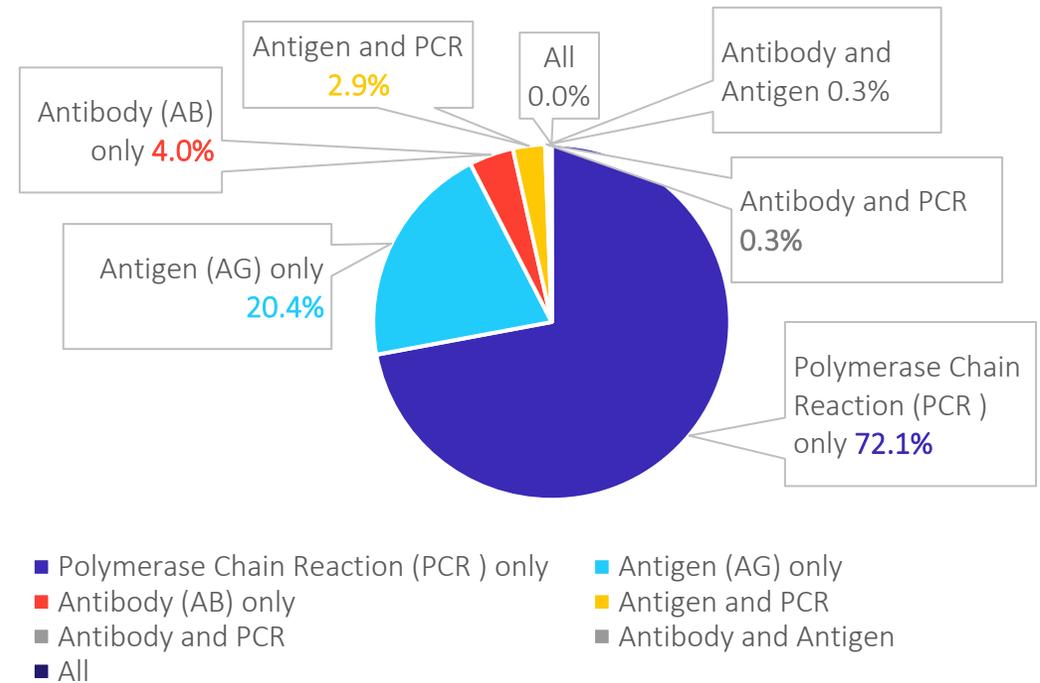

Avalon Network – COVID-19 Volume and Member Centric Data

Monthly Member Count by COVID-19 Testing Encounters per Month, 2021

- 2,407,430 total tests in first 8 months of 2021
- 3.8% of members had 3+ tests/month

Percent of Members by COVID-19 Tests in a Single Encounter

- 20.4% Antigen only—low sensitivity and specificity
- 3.5% of members had 2 tests/same day

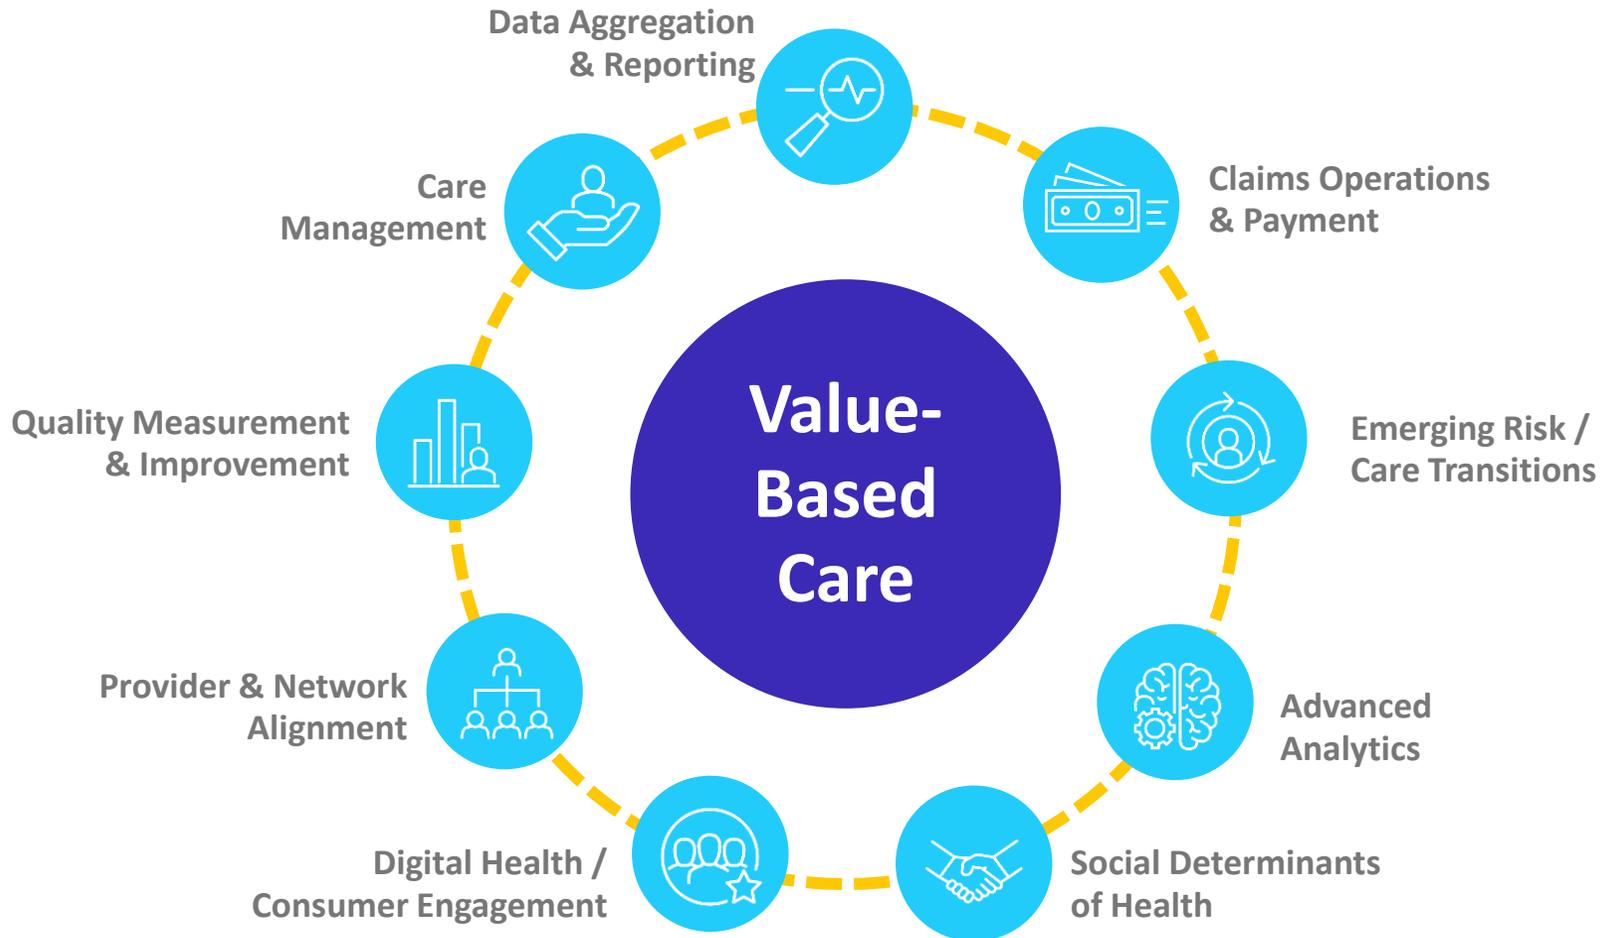

DELIVERING VALUE-DRIVEN CARE USING LAB TEST RESULTS

Rahul Singal, M.D., Chief Medical Officer, Avalon

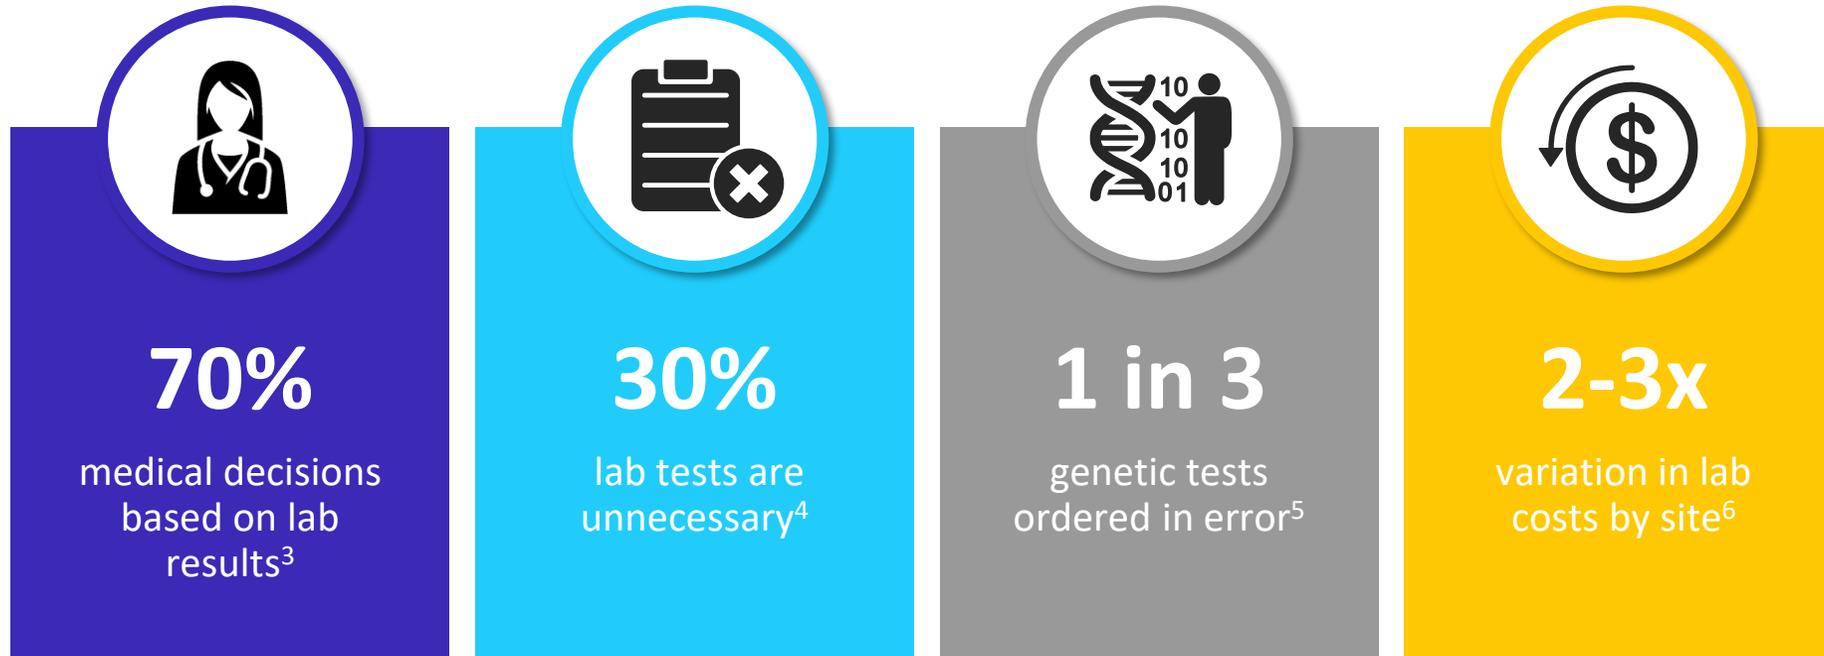

Value-Based Care is Multi-Faceted

- Priorities vary widely between health plans
- Solutions may be integrated (in- vs. out-sourced)
- Measures of success range on a spectrum
- Initiatives report to various c-suite leaders

The Unrecognized Power—and Exposure—of Lab Testing

> 13 BILLION LAB TESTS PERFORMED IN THE US EACH YEAR COSTING \$82B^{1,2}

5. The Landscape of Inappropriate Laboratory Testing: A 15-Year Meta-Analysis

Zhi M, Ding EL, Theisen-Toupal J, Whelan J, Arnaout R (2013) The Landscape of Inappropriate Laboratory Testing: A 15-Year Meta-Analysis. PLOS ONE 8(11): e78962. <https://doi.org/10.1371/journal.pone.0078962>

6. Shrank WH, Rogstad TL, Parekh N. Waste in the US Health Care System: Estimated Costs and Potential for Savings. JAMA. 2019

The Pathway to Value-Driven Care: Start at the Source

LAB TESTING IS THE GATEWAY FOR APPROPRIATE DIAGNOSIS AND TREATMENT CARE PLAN

Only **invest in things that will help** the patient, provider and payer

Drive the **right outcome** while achieving **cost alignment in real time**

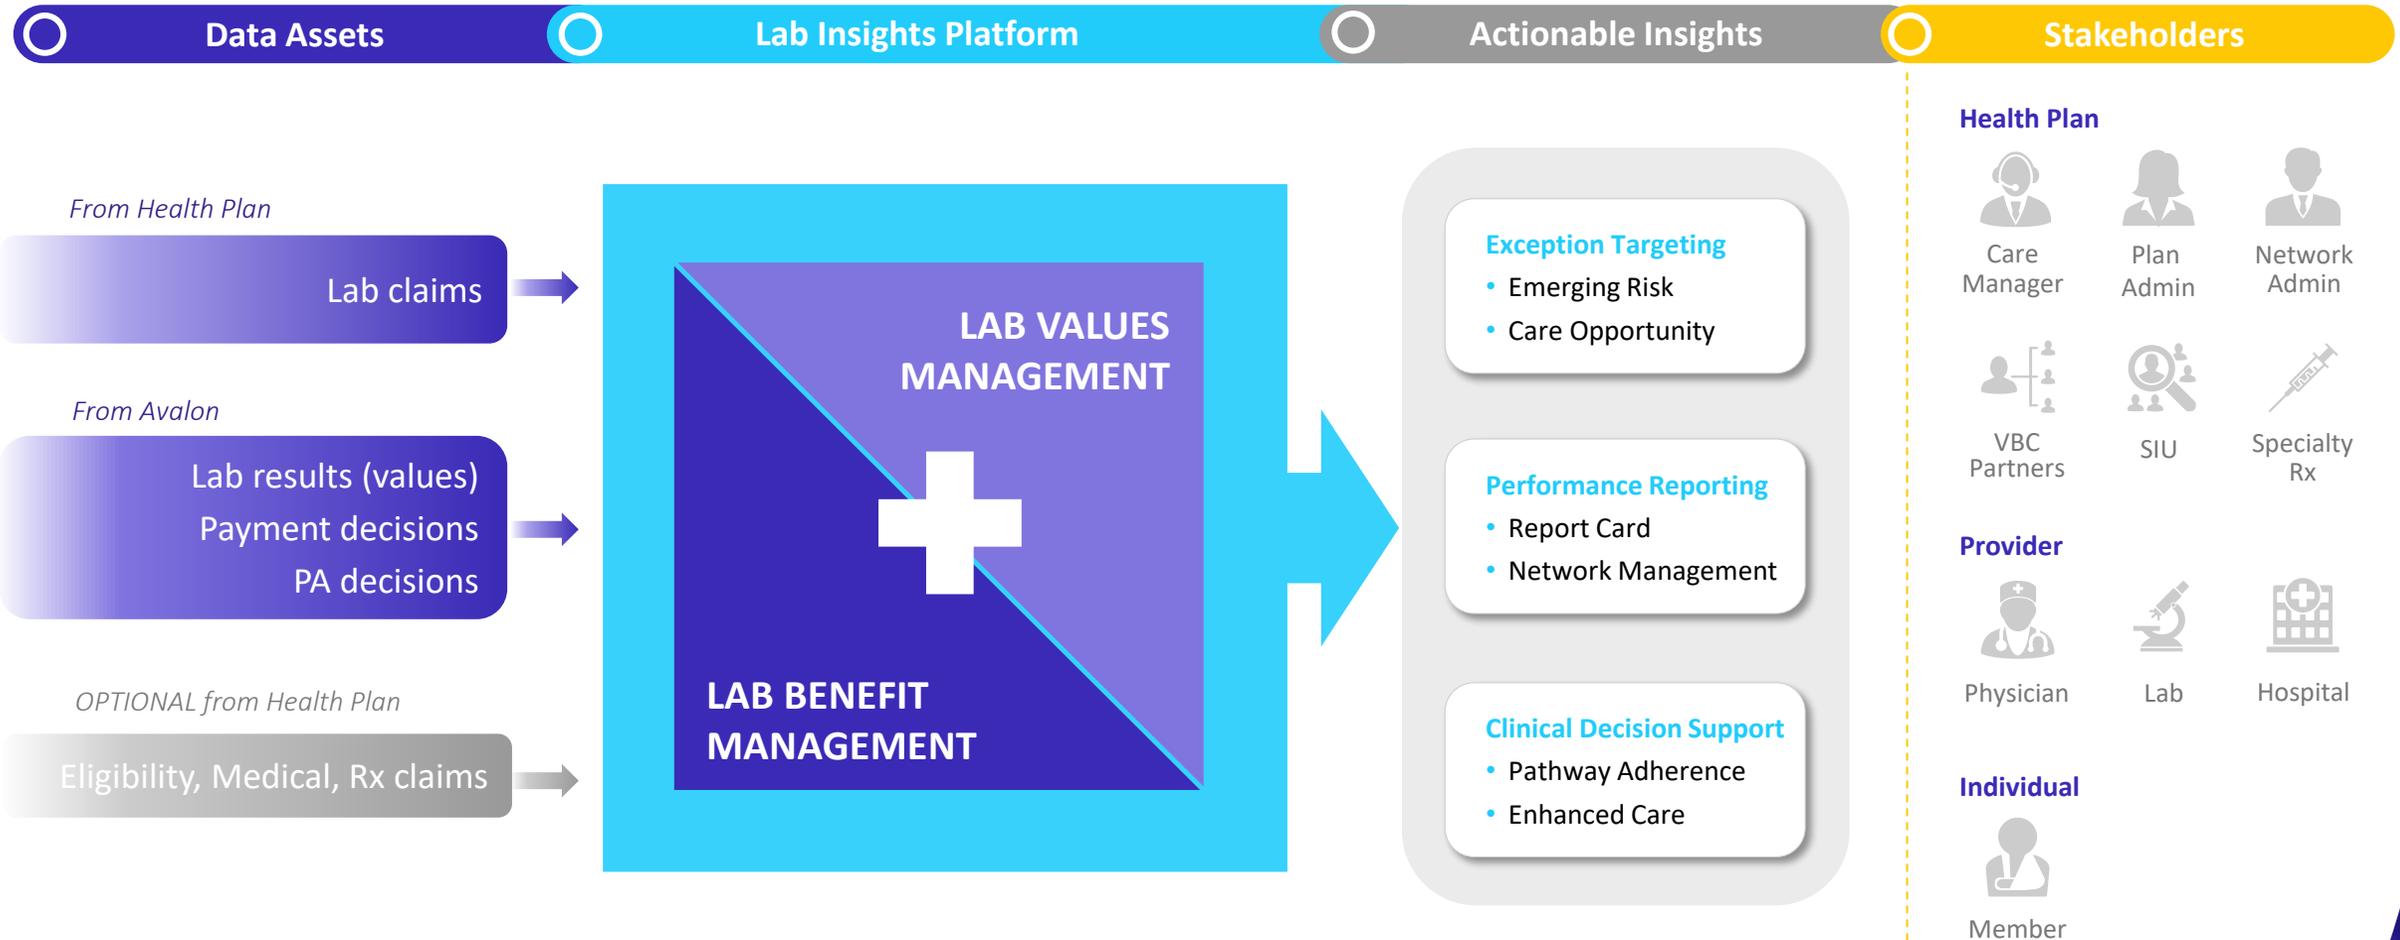

Reduce massive waste in time, money and uncertainty that are not helping to improve outcomes

Avalon's Lab Insights System

CRITICAL INSIGHTS AT EACH STEP TO DELIVER VALUE-DRIVEN CARE

Avalon Lab Values Management

Examples: Cancer, diabetes mellitus, chronic kidney disease, liver disease, high-risk pregnancy, mental health, pharmacogenomics

Criteria for Lab Values Management Condition

CANCER, DIABETES, CHRONIC KIDNEY DISEASE, LIVER DISEASE, HIGH RISK PREGNANCY, MENTAL HEALTH

- Prevalence:
 - Each condition has at least a 2% prevalence
 - Conditions represent at least 20% of a population
- Higher Cost: Each condition add at least 50% to the baseline PMPM cost
- Variation of care
 - Conditions have care variations that lead to wide differences in cost and quality outcomes
 - Variations occur within same community and across communities (disparities, SDOH)
- Lab results are essential for treatment decisions

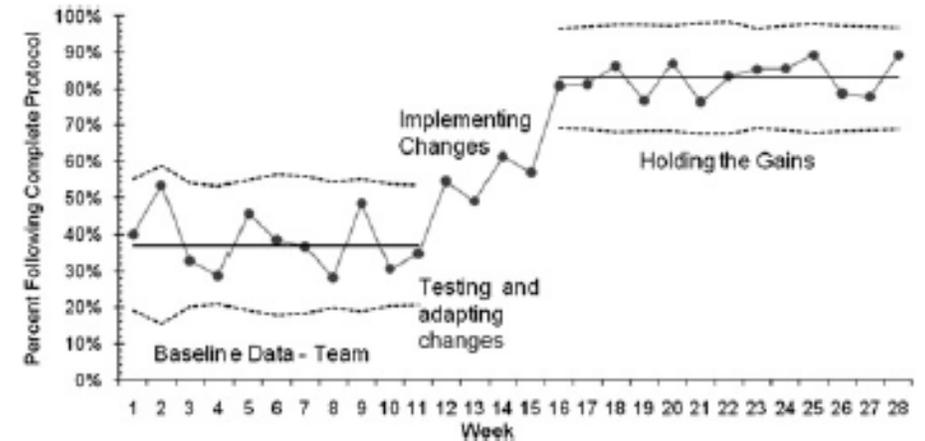

Figure 1 Annotated Shewhart control chart—using protocol.

BMJ Qual Saf 2011;**20**(Suppl 1):i36–i40. doi:10.1136/bmjqs.2010.046334

USE CASES

Chronic Kidney Disease (CKD)

Breast Cancer

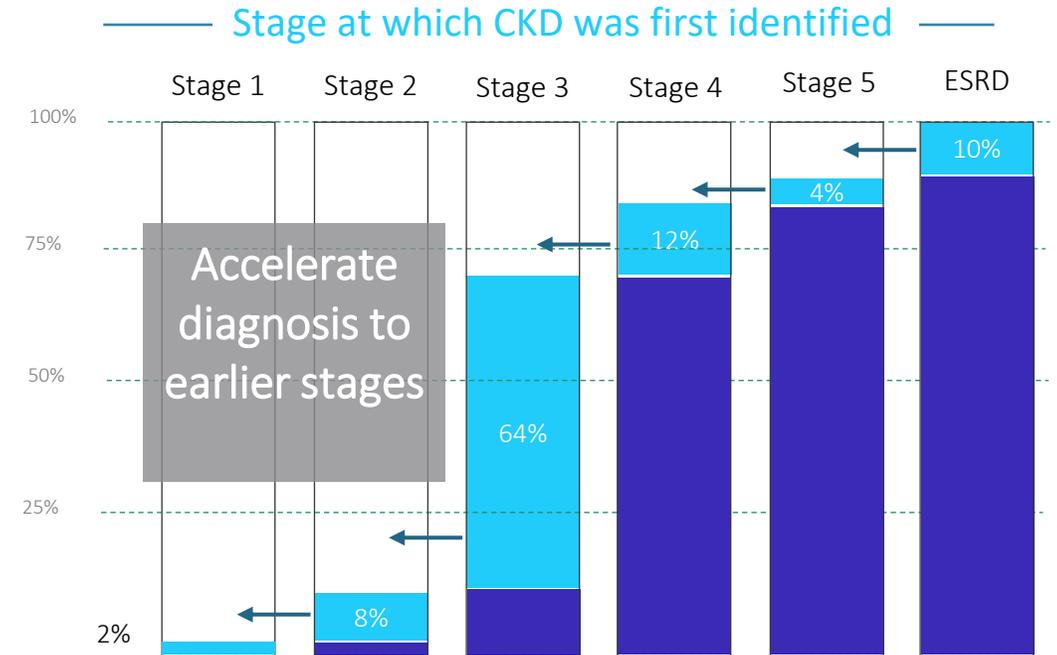

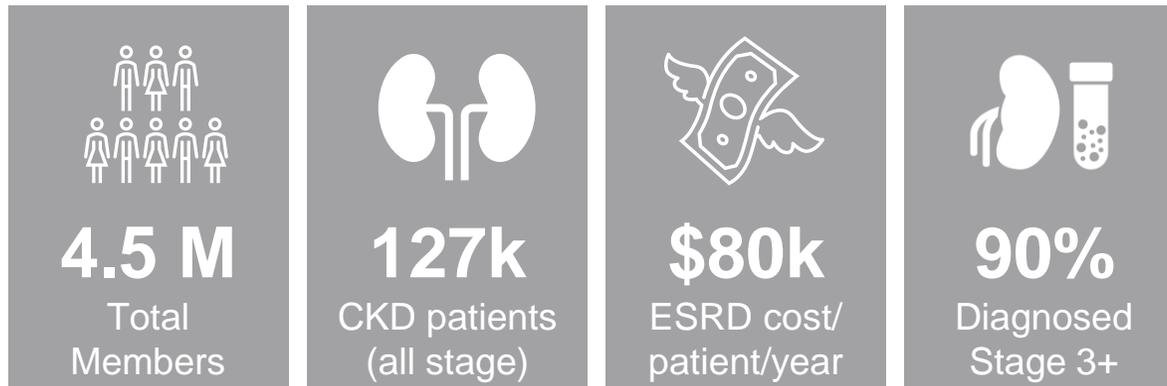

Diabetes

Lab Values Management: Early Detection of CKD

U.S. Data (from CDC):

- **37 million** CKD cases in US adults
- **90%** of them are unaware
- **9 of 10** CKD patients diagnosed at Stage 3 or later

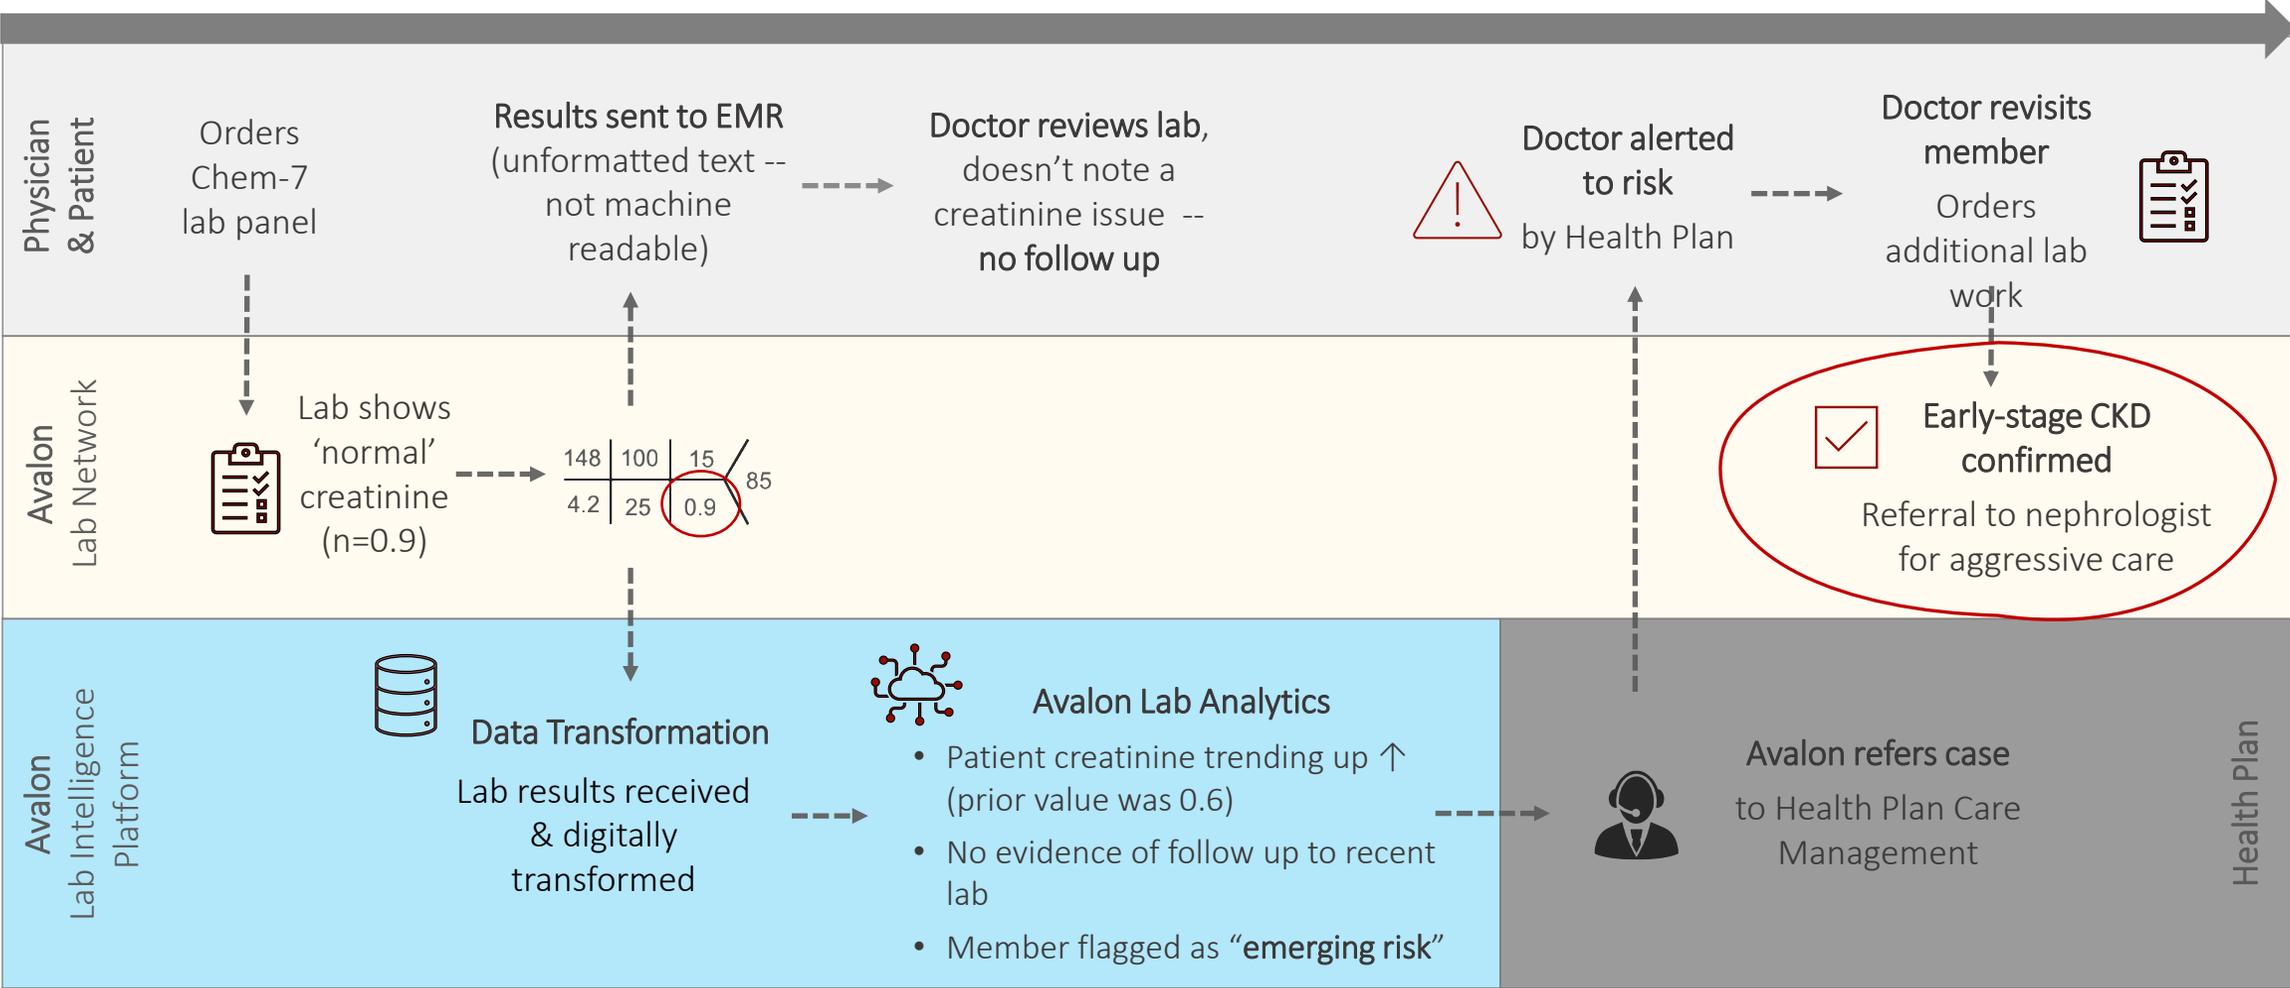

Avalon Data:

Using lab data for earlier detection can delay ESRD by years

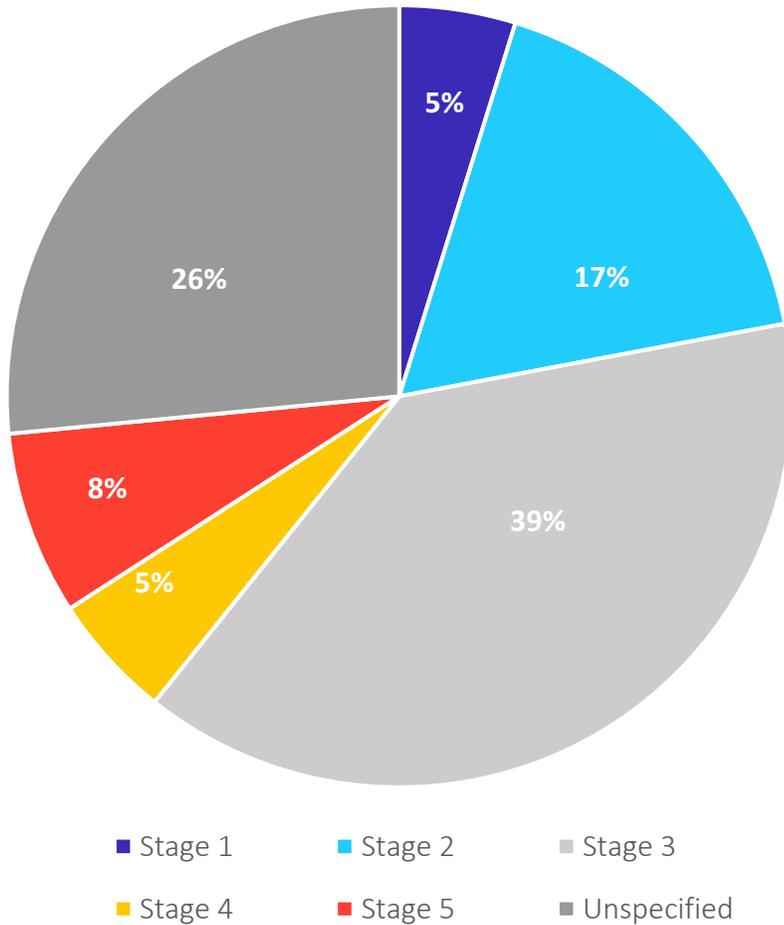

Member Journey: Early Detection of CKD

Member: 58-YO Female; 104 pounds; no history of CKD

CKD Population

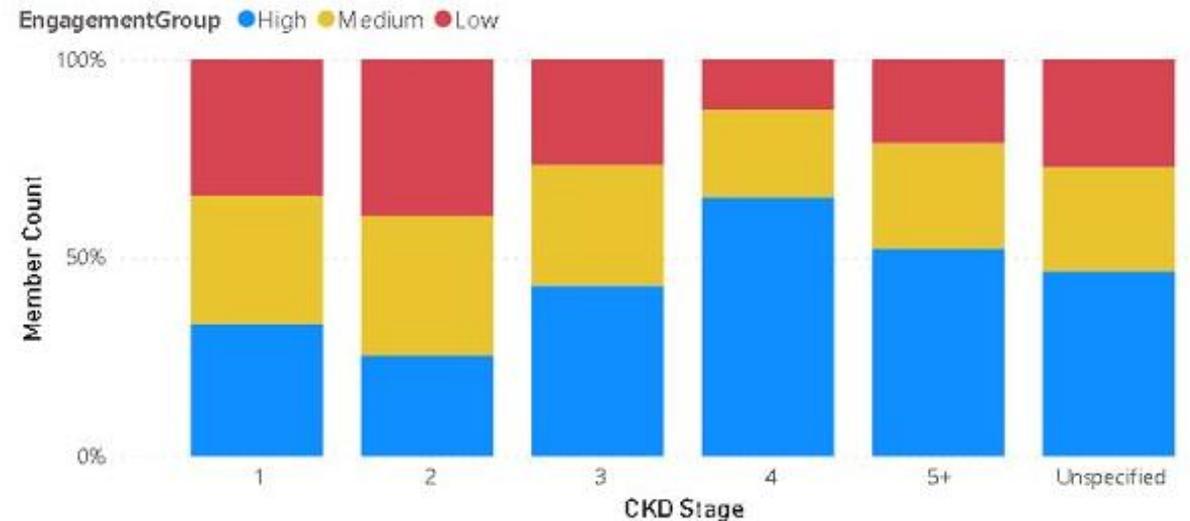

CKD Cases by Stage

Avalon Engagement Score measures CKD quality of care - scoring attributes include:

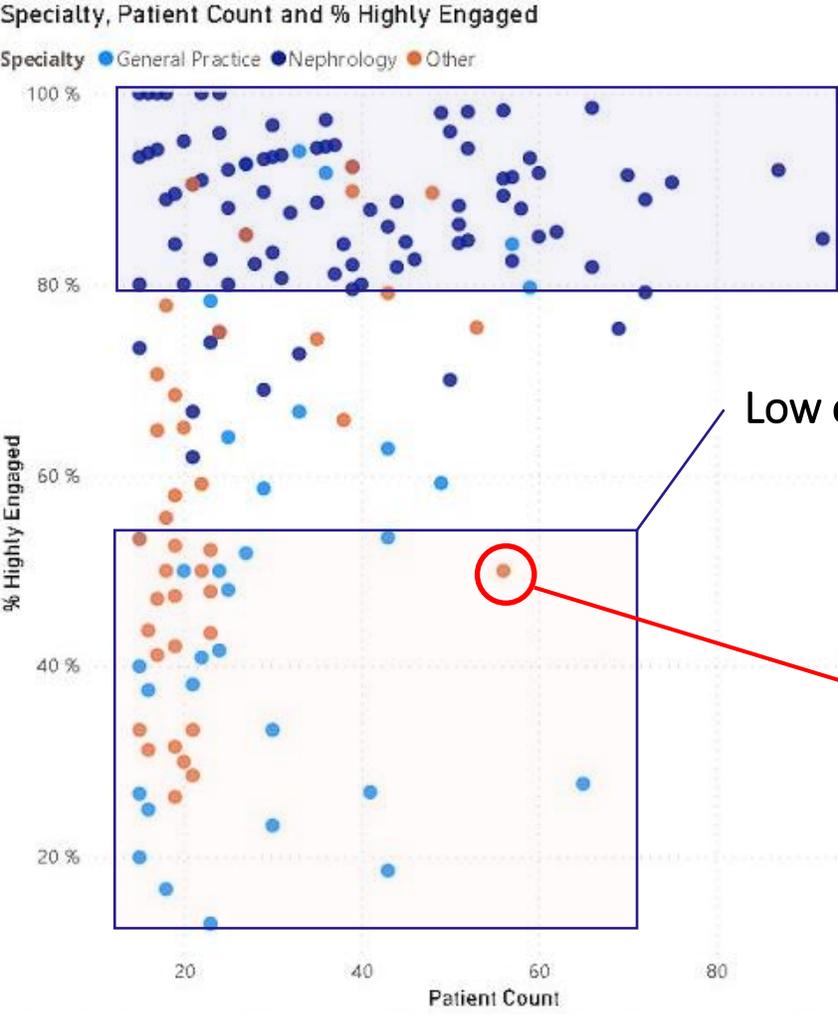

- Annual Urine Albumin Creatinine test
- Annual Comprehensive profile
- At least 3 annual visits (labs)
- Visit to nephrologist

HIGH = 3+ attributes / MED = 2 attributes / LOW = 1 or 0

Provider CKD Performance

% OF MEMBERS “HIGHLY ENGAGED” VS. # OF MEMBERS MANAGED BY PROVIDER

High engagement = Compliance with Process Measures

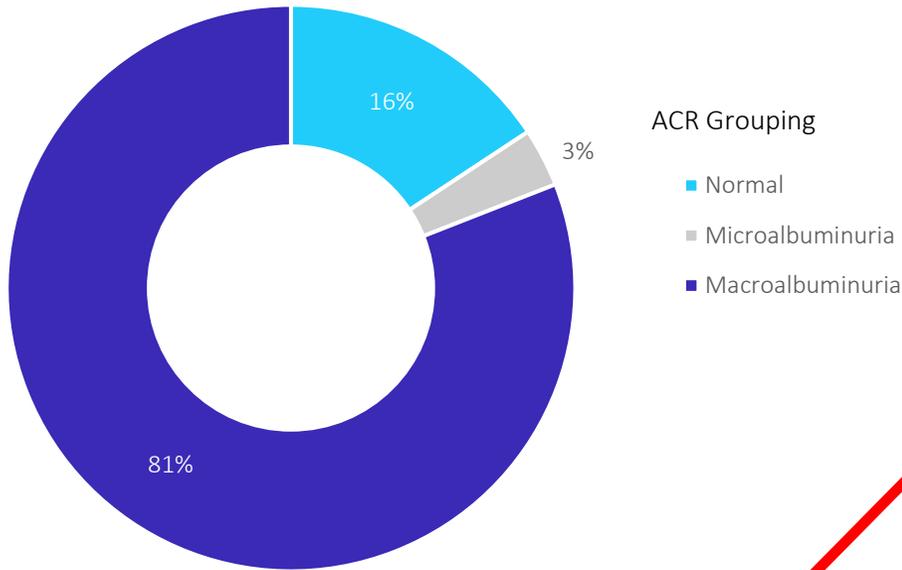

Low engagement = Care Improvement Opportunity

General practice/Nurse practitioner-xxxxxx5086

First Initial	Last Initial	Avalon ID	Masked Zip	Age	Stage	Engagement	DIAB	HTN	Neph	CMP	HBA1c	Lipid

Early Detection of CKD: + Protein in Urine

Member Count with Lab Values by ACR Grouping

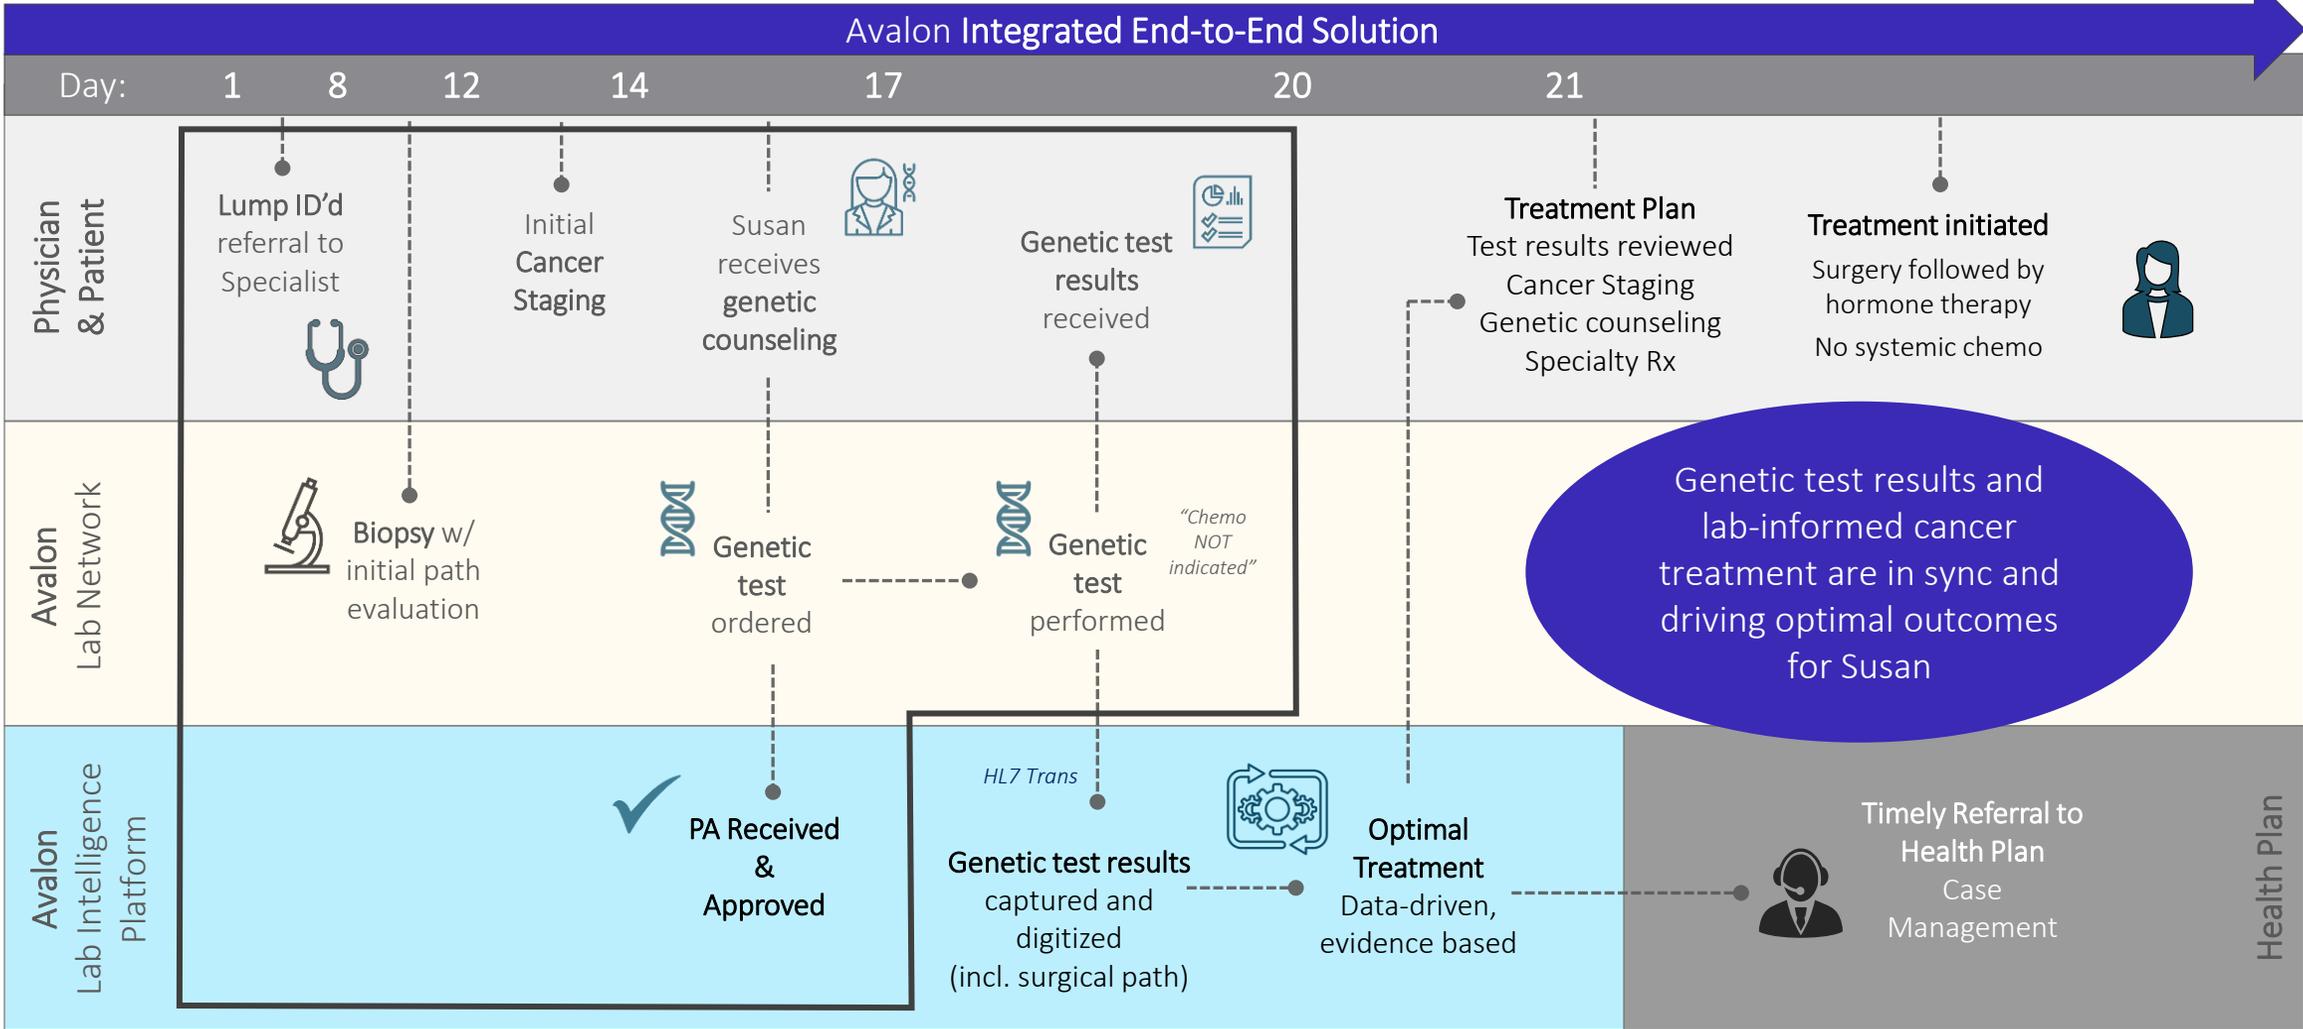

- Approximately 20% of diabetes population has positive protein detected in urine
- Target list is “suspicious” for early CKD and warrants further follow up

Avalon ID	Age	Masked Zip	DiseaseGrouping	EngagementGroup	NephYN	DIABYN	HTNYN	HbA1cValue	SerumCreatineValue	ACRValue

Member Journey: Stage II Breast Cancer

Susan is a 45-YO single mother of two teenage boys, and her GYN has discovered a lump...

Measuring Adherence to Lab-Informed Treatments

Susan is a 45-YO single mother of two teenage boys, and her GYN has discovered a lump...

Successful surgery and results of a genetic test (Oncotype DX) are consistent with: “Chemo does not provide benefit”

Oncology Center #1

Oncology Center #2

Oncology Center #3

Patients w/ Oncotype DX score <25*

200

150

240

treated with chemotherapy

9

15

36

% treated with chemotherapy

4.5%

10%

15%

Use Case: Population Profile – Diabetes

Process Measures

Each member earns one ✓ for each of the following (max of ✓✓✓):

Annual A1c test

Annual lipid profile

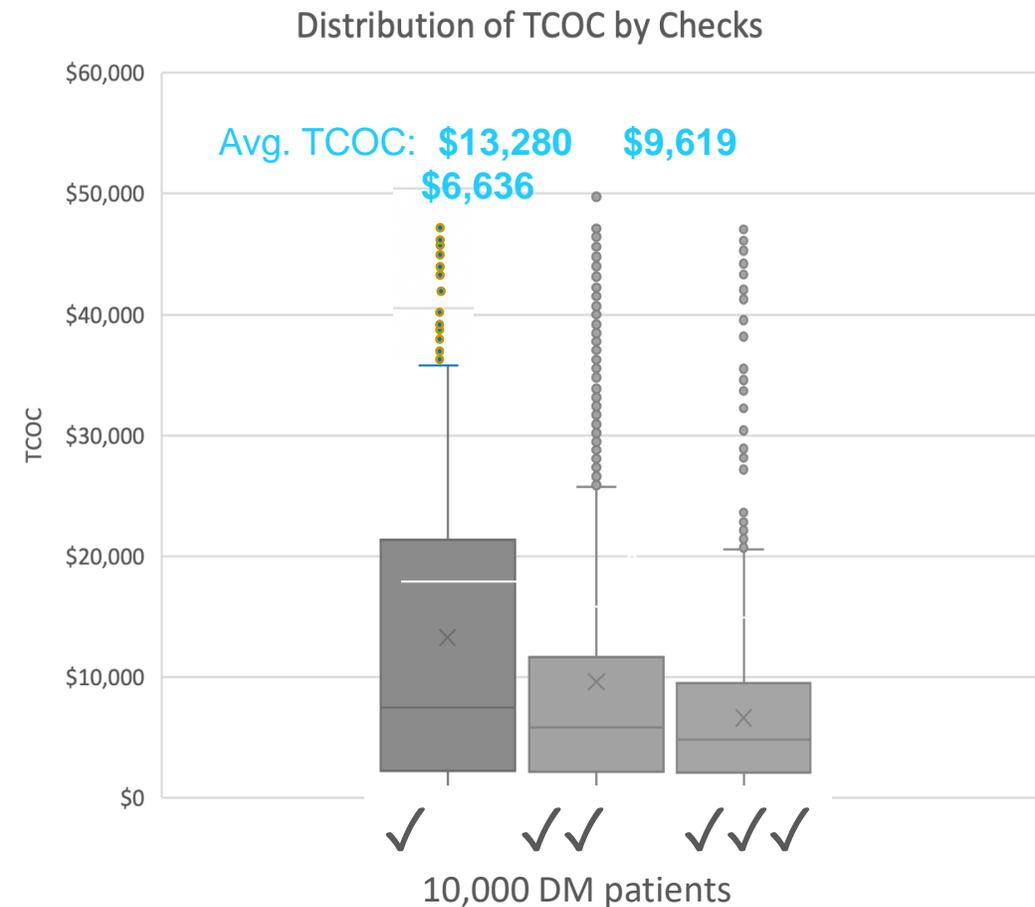

2 PCP visits per year

Members segmented into:

✓ = only 0 or 1 of 3 measures

✓✓ = 2 of 3 process measures

✓✓✓ = 3 of 3 process measures

Use Case: Physician Quality Profile - Diabetes

Physician network stratified by Process Measures
(Ratio $\sqrt{\sqrt{\sqrt{\quad}}} / \sqrt{\quad}$) and Panel Size

Process Measures

- Analysis based on claim data
- Measures consistent with HEDIS and Star Metrics
- Normally we would focus efforts on lower portion of graph with goal of improving process metrics . . .
- . . .but what if we look at higher quality process docs? Are they the same?

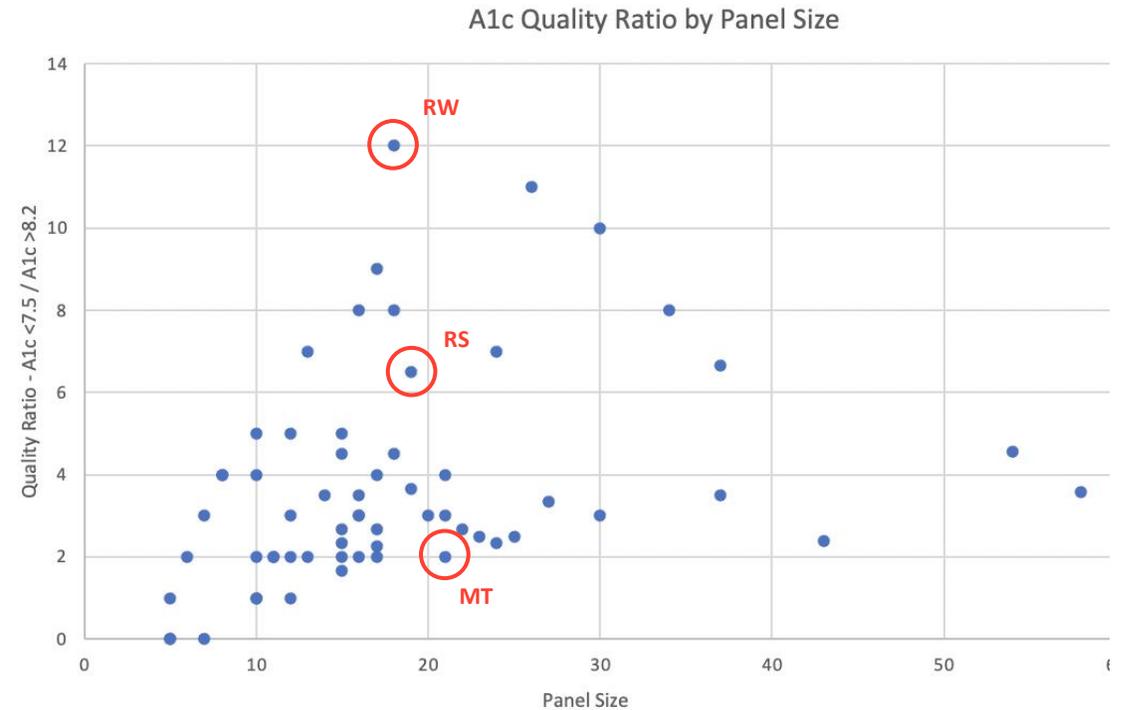

Use Case: Physician Quality Profile – Diabetes

Process Measures

Physician network stratified by Process Measures (Ratio $\sqrt{\sqrt{\sqrt{\quad}} / \sqrt{\quad}}$) and Panel Size

Outcome Measures – A1c results

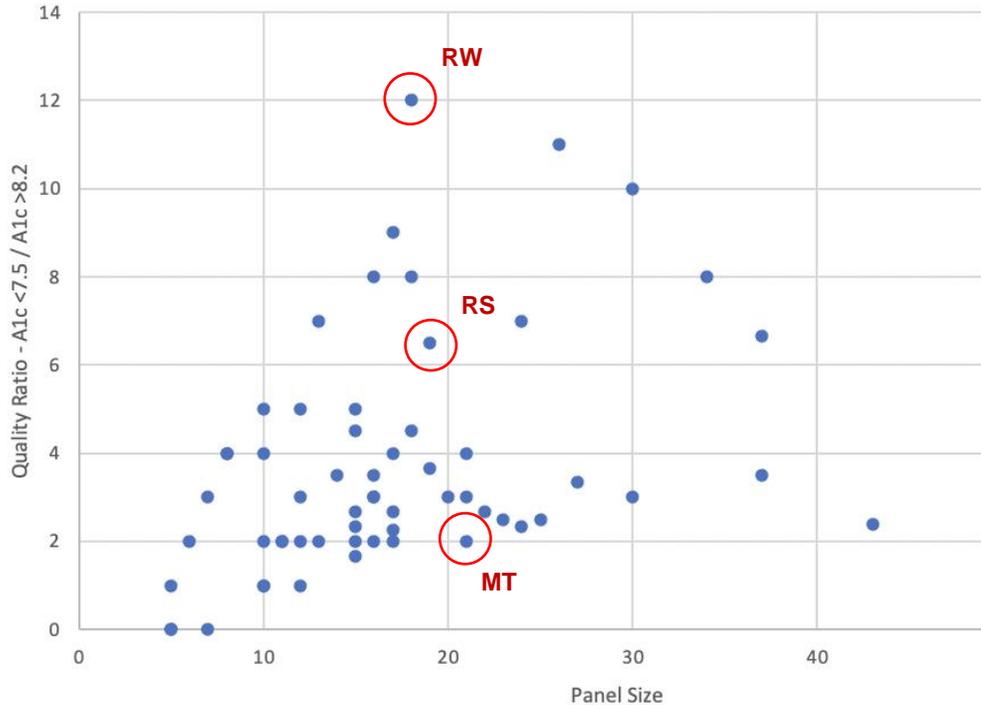

Quality Ratio:
members A1c < 7.5% / # mem > 8.2%

Use Case: Physician Quality Profile – Diabetes

Outcome Measures – A1c results

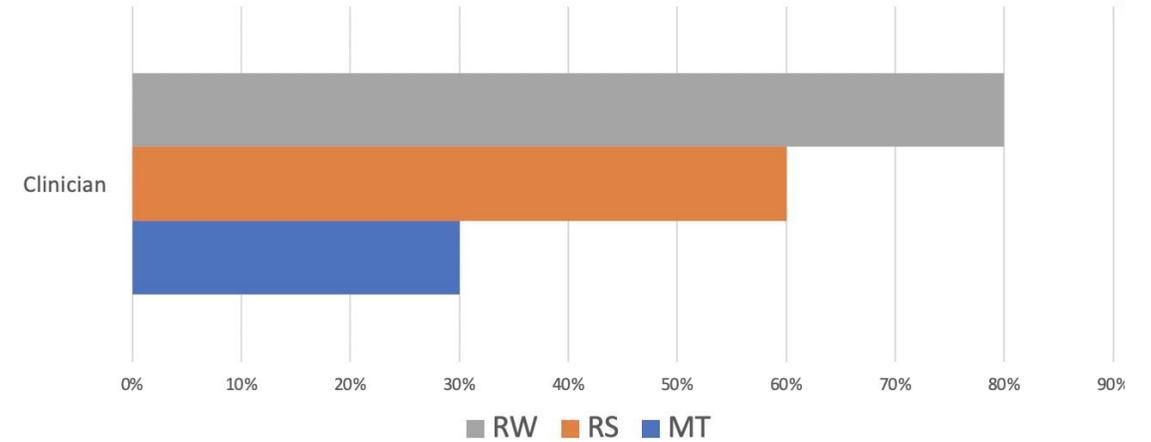

A1c Quality Ratio by Panel Size

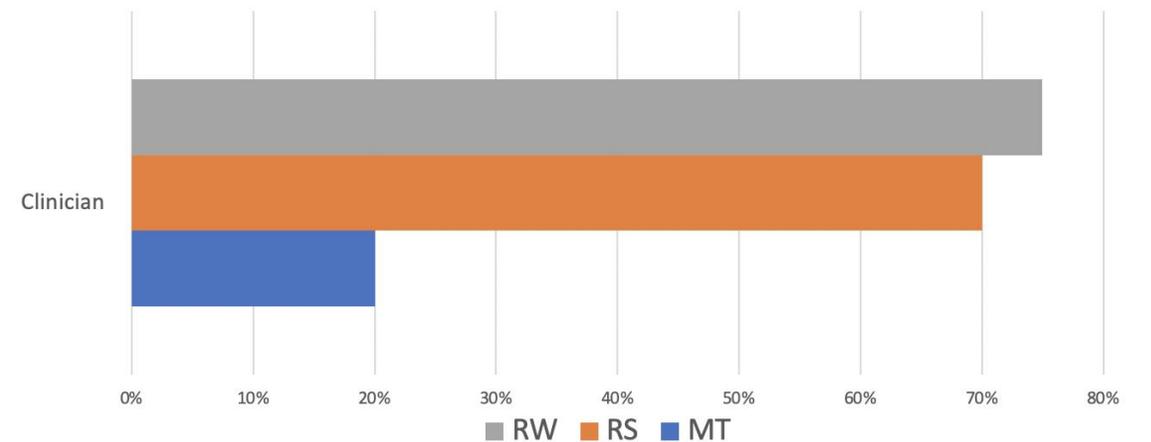

Quality Ratio:

members A1c < 7.5% / # mem > 8.2%

Intention to Treat: % change Rx if A1c > 8.2%

% Re-test A1c w/ in 4 months

Summary

- Lab Values when digitized at scale provide unique insights into a population
- Lab Values are leading indicators for identifying emerging risk in an individual (contrast with hospital admission which is a lagging indicator)
- Quality of care and performance by providers can be improved by leveraging the right data and insights

CLOSING REMARKS

Bill Kerr, M.D., Chief Executive Officer, Avalon

avalon
